

PORTER PIPE & SUPPLY[®]
PARTNERSHIP WITH **PURPOSE**

GOT GAS?

If you do, we have solutions!

We offer the products that will regulate its pressure or meter its flow! Whether it's for a small burner, a unit heater or a high pressure industrial gas application, we have what you need.

Model 325-5A Regulators

Model 496 Regulators

Pietro Governor

Model 243 Regulators

Turbine Flow Meters

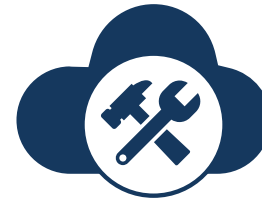

Diaphragm Meters

Information Required to Select Gas Regulators and Flow Meters

- Volumetric flow rate of gas expressed in CFH or BTU/hr.
- Inlet pressure of gas flowing into the regulator/flow meter
- Regulated or desired outlet pressure leaving the regulator
- Flowing media (i.e. natural gas, propane, etc.)
- Indoor vs. outdoor installation
- Physical properties if other than common gases
- Line size of the piping system in which the equipment will be installed
- Electrical characteristics available to the electronics of the flow meter
- Desired mechanical or electrical characteristics coming from the flow meter (i.e. pulse, current or voltage relative to flow rate)
