FIRESTOP PRODUCTS

TRANSFORM YOUR FIRESTOP SOLUTIONS WITH HOLDRITE® HYDROFLAME™ PRODUCTS

HoldRite's line of sealants, fire wraps and pipe collars, sleeves and more are designed to help reduce installation time, increase job site efficiency and protect property against the spread of fire, smoke and poisonous gases. And with Porter Pipe's 98% fill rate, you'll always get the HoldRite products you need, right when you need them.

HYDROFLAME™ PRO SERIES CORRUGATED METAL DECK PLATES

Sizes available for 1", 2", 3", 4" and 6" sleeves.

- For use with concrete pours over corrugated metal decks
- Assembles directly to HoldRite HydroFlame Pro Series Firestop Sleeves
- Superior strength and stability
- One-piece metal deck solution
- Must be ordered with HydroFlame Pro Series Sleeves

HYDROFLAME™ PIPE COLLARS

Sizes available for 1½", 2", 3", 4" and 6" pipe.

- No curing time
- Easy and fast installation
- Labor savings by not having to measure material
- Highly intumescent
- Economical solution for plastic pipes
- FBC™ system compatible
- Approved for PVC, CPVC, FRPP, ABS and PVC/ABS foam core insulations and more
- Clean Air Gold certified

HYDROFLAME™ 200 FIRESTOP SEALANTS

Available in 5 gallons, 10.3 and 30 oz cartridges and 20.2 oz sausages.

- Flexible (Elastomeric), low VOC, paintable and water-based
- Excellent freeze-thaw
- High performance intumescent
- Clean Air Gold certified
- 3-year shelf life
- FBC™ system compatible
- Easily dispensed (caulking gun or trowel)
- G21 testing for obstruction of mold growth
- Safe for plastic and metallic pipes

HYDROFLAME™ WRAP STRIPS

Available in ¼" x 1" x 12' intumescent wrap strip.

- No curing time, simple to apply and flexible
- Excellent freeze-thaw properties
- Systems up to 12" (PVC)
- Forms hardened char after expansion
- Highly intumescent
- Can be installed from the topside of floor eliminating the need for ladders, refer to specific UL details
- FBC™ System Compatible
- Clean Air Gold certified
- Can be used with Custom Collar

HYDROFLAME™ PRO SERIES TELESCOPING AND NON-TELESCOPING FIRESTOP SLEEVES

Telescoping and non-telescoping designs available for ½" to 6" penetrants – piping, conduit, cables, etc. Telescoping design adjusts from 8" to 12" in ¼" increments and can be cut to as short as 2½". Non-telescoping design is 7¾" tall and can be cut to as short as 2½".

- Ideal for flat concrete form decks (cast-in-place) and corrugated metal decks (corrugated deck plate required)
- For insulated and non-insulated pipes
- Includes locator whiskers to locate buried sleeves and identify pipe type (metal or plastic)
- Dimensions on sleeves allows for simple height adjustments
- Safety caps meet OSHA hole cover requirements
- UL Listed firestop devices (2 or 3 hour F-ratings)
- Meets and/or exceeds building code requirements
- Built in fire, smoke, gas and water protection
- UL W-Rated seal, water-tight for most penetrants
- Allows for contraction, expansion, movement and off-center pipes
- Reduces piping system noise transfer by maintaining annular spacing
- Interlocking base capability assists with layout alignment
- UL 50 Pa Ratings
